HELP
CHOOSE YOUR CITY

When planning for a travel, climate and weather are important factors in tourists' decision making. People always check the weather of the location. Most of weather forecasting system provide up to 10 days forecast. So we look for climate record to estimate the climate.

People who are planning to travel and want to know which month would be appropriate to go.

Provide climate data visually for people to easy to understand without complex graphs.

Allow comparison of the climate of major tourist destination.
